Daily, animals in our shelters are being moved to the “Red List”, otherwise known as the, “euthanasia list”. Young, healthy, loving animals that are senselessly being killed simply because there is no more space. Every day, shelters fill to capacity with an increasing number of abandoned pets and strays that have been picked up by animal control officers. This is no longer just a problem, this is an epidemic. Hundreds of rescues work daily to help these innocent animals, however, due to the increasing cost in Veterinary care, they are often forced to stop their intake. In addition, many families are unable to afford basic vet care, sterilization and emergency care to their their companion animal(s).

Doodle Rock Rescue, a 501(c)3, was founded in March of 2017. We have grown rapidly, not only in terms of the number of dogs we have successfully rescued, rehabilitated and re-homed, but also in the number of avid followers. We have over 37,500 followers on Facebook, 9,600 followers on Instagram, and last month, our website had over 80,000 (“**unique**”) visitors a month!

After careful planning and collaboration with other rescues and shelters to determine current and future needs, we have secured a building that will soon be home to, “CHEW Animal Clinic.” CHEW Animal Clinic, will open a full-service, nonprofit Veterinary clinic, in Dallas. This property is in a **great** location (Walnut Hill & Greenville Avenue). It will not only service the rescues who work daily to save these innocent animals, but also provide Veterinary care to families who cannot afford the increasing Veterinary costs. In addition, CHEW Animal Clinic will have outreach programs to the many rural shelters, those with little to no expose - some of the highest euthanasia rates in the Nation. Finally, we will focus on bringing awareness to the overpopulation in our state and help prevent senseless euthanasia.

We need your help to make CHEW Animal Clinic possible. Due to the condition of the 2800sqft building, everything from the floor to the roof will have to be replaced. Office supplies, a list of veterinary equipment and medicine is needed prior to opening our

doors. In addition, we will need to hire two Vet Techs, an administrative staff and a full time Veterinarian.

Behind CHEW Animal Clinic, there is an adjoining .7 acres. CHEW Animal Clinic will hold community gatherings, which in turn, will only bring additional awareness to our cause and your participation. In addition, inside the clinic, there will be a wall donated to those who came together get CHEW Animal Clinic up and running (custom 3D plaques). In addition, we will add your company's link to our website and invite one representative to our Grand opening/Ribbon Cutting!

Please consider partnering with us to create this much-needed clinic! We are available to meet you on-site, provide architectural plans and/or answer any questions you have about this project.

Thank you for your consideration,

Leigh Sendra
